- Ability to create bespoke shapes in house with bevels to suit the unique shape
- Variety of glass types ranging from 6-19mm clear, grey, bronze, satin & mirror
- Able to work from sent in board templates through

Specialist Toughened Glass (STG) has always adapted to current market trends in order to provide glazing and personalised glass that pushes the boundaries of bespoke design.

Through ongoing research and investment, STG has opened up a brand new production strand in the form of bevelled glass. Our new state of the art CNC comes equipped with new bevelling tools that allow us to place a beautifully tapered edge on any custom shaped piece of glass, ranging from crisp and bold square edged bevels to smooth, gradual bevels that follow a curved edge.

With a wide range of sizes from 10mm - 60mm wide, we can provide an additional touch of elegance and style to all of glass tints and thicknesses, with mirror as an additional material option.

Beveled glass can compliment our other in house services including lamination and digitally printed designs. Our digital printer can print directly on to the bevel side or reverse face with a variety of inks and colours including a special "sandblast effect" to produce one of a kind tabletops, furniture and home / business accessories unavailable anywhere else.

Prices from £120 per ²m
